UV print options for STANDARD cars

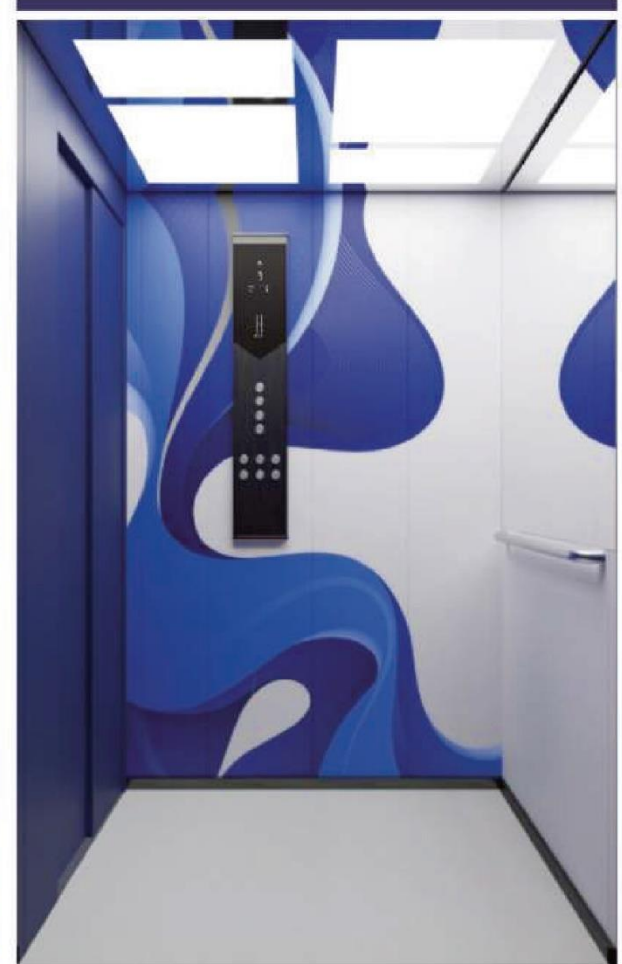

ALOE

SAFFRON

CORNFLOWER

Car walls and car/shaft doors can be finished with UV print

Custom artwork, including corporate branding, logos and photographs, can be applied (provided it is available in high-resolution or vector format).

The background features a complex pattern of white, three-dimensional, stepped lines on a light blue gradient. These lines create a sense of depth and movement, resembling a stylized architectural structure or a data flow diagram. At the bottom, a solid blue horizontal bar spans the width of the image, serving as a base for the main text.
